bc graphics, inc.

The yellow box is the USPS approved area where the postal barcode needs to be. The sample barcode shown is the exact size for mailing. The barcode and address can be placed anywhere inside the yellow box, so when designing please allow blank space and an additional .125" so not to interfere with the address. The postal permit shown in the top right corner must be used if we are the mailing company. Please make sure this is a Standard class permit unless you prefer it to go First Class. Please note First Class postage will cost more for this size post cards.
